

TheBUG OiS – Shown here with the Pulmonetics LTV 900 vent system.

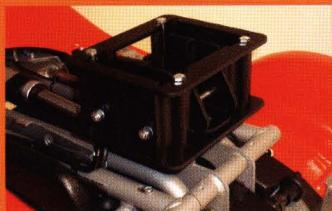

The batteries are integrated into the frame and are removable.

TheBUG OiS – Shown here with an Oxygen Cylinder adapter on the back of the frame. The cylinder articulates as the upper assembly is tilted.

Utilizing the PlainSense "Dock" interface, the upper assembly of theBUG is able to quickly and easily adapt to a power mobility base.

Specification Guidelines

There are two sizes of Lower Mobility Bases for theBUG – "Small" and "Medium". The Upper Seating Assembly always remains the same size.

The chosen size of the Lower Base is determined by the desired solid seat width giving consideration to future replacement solid seats for growth. The rear wheels can be adjusted out as wider seats are added to the chair.

Also, if there will be devices attached to the chair (i.e. a ventilator or an oxygen cylinder) the "Medium" is always recommended. This increases the chair's stability as its "footprint" on the rolling surface is 1" longer and 3" wider.

The width of the aluminum seat and back platform on the Upper Seating Assembly is 10". There is no minimum solid seat/back width that can be added to the platforms. Utilizing lateral supports, accommodating hip and trunk widths from 7" are common.

Specifications:

Lower Mobility Base

Small

| | |
|---------------------|--------------|
| Weight ¹ | From 12 lbs. |
| Overall length | From 27" |
| Width (CL of hubs) | From 17" |
| Solid Seat Widths | To 14" |

Medium

| | |
|---------------------|--------------|
| Weight ¹ | From 13 lbs. |
| Overall Length | From 28" |
| Width (CL of Hubs) | From 20" |
| Solid Seat Widths | To 16" |

Upper Seating Assembly (Detachable From Base)

Standard

| | |
|---------------------|--------------|
| Weight ² | From 12 lbs. |
| Seat Angle | 3 Degrees |

OiS (Tilt in Space)

| | |
|---------------------|------------------------|
| Weight ² | From 15lbs. |
| Seat Angle | Tilt -5 to +45 Degrees |

In Common to Both the Standard & OiS

| | |
|---------------|--------------------------|
| Seating Depth | From 6" (Adj. 4") to 16" |
| Seating Width | From 7" to 16" |
| Back Angle | -5 to +30 degree |
| Back Height | From 10" (Adjustable) |
| Leg Drop | 4" to 15" |

¹ w/o rear wheels

² w/o solid seat/back and positioning devices
